Nellore, Andhra Pradesh

PROFESSIONAL SUMMARY

Final year Computer Science Engineering student with foundational knowledge in Artificial Intelligence, Machine Learning, and Full-Stack Development. Developing skills in AI Tool Behavior Analysis with basic understanding of LLM architectures including agent-based systems that think like humans and complete complex tasks autonomously. Gaining experience in analyzing AI model performance, evaluating input-output patterns, and assessing AI-generated content for accuracy. Skilled in developing predictive models, web applications, and implementing NLP solutions with 90%+ accuracy rates.

EDUCATION

Bachelor of Technology - Computer Science & Engineering

Kalasalingam Academy of Research and Education, Tamil Nadu

2022 – 2026

CGPA: 7.5/10.0 | Final Year Student

Pre-University Course

Krishna Chaitanya Junior College, Andhra Pradesh

2022

Percentage: 86.3%

TECHNICAL SKILLS

Category	Technologies
Programming Languages	Python, JavaScript, HTML5, CSS3
AI/ML Technologies	scikit-learn, TensorFlow, NLP, Computer Vision
Web Development	Flask, RESTful APIs, Responsive Design
Data Analysis	pandas, NumPy, Matplotlib, Seaborn
Database	SQL
Tools	GitHub, MS Word, PowerPoint, Jupyter Notebook, Google Colab
AI Analysis Skills	Basic AI Tool Analysis, LLM Understanding, Prompt Engineering, Model Assessment
Soft Skills	Time Management, Problem Solving, Communication, Leadership

KEY PROJECTS

AI-Powered Sentiment & Profanity Detection System

- Developed NLP algorithm achieving 92% accuracy in toxic content detection using Python and NLTK
- Designed scalable architecture for social media platform integration

Heart Disease Risk Prediction Model

- Built ML model with 87% accuracy using scikit-learn for healthcare risk assessment
- Created interactive dashboard for healthcare professionals

Worker Booking System

- Developed Flask web application with dynamic scheduling and real-time availability
- Implemented automated conflict resolution system

Computer Vision Waste Classification

- Trained CNN model on 5,000+ images achieving 90%+ accuracy using TensorFlow
- Created web interface for instant waste classification

CERTIFICATIONS

Design and Analysis of Algorithms - CodeChef

Complete AI & ML Data Science Bootcamp - Udemy

Soft Skills & Development - NPTEL

ACHIEVEMENTS

Winner - TechNOVUS 2.4 Hackathon (Best Prototype Award)

Speaker - AI-driven Sustainability Research at INNOVATE Euphoria

Participant - International Conference on Agriculture Innovation

Mentor - Python programming for underprivileged students

LANGUAGES

Telugu: Native | English: Professional
