## SKILLS

|                       |   |                                                        |
|-----------------------|---|--------------------------------------------------------|
| Programming Languages | : | C, C++, JavaScript , Python, Kotlin.                   |
| Mobile Development    | : | Android Development (Kotlin), Responsive UI/UX Design. |
| Backend Development   | : | REST APIs, API Integration.                            |
| Tools & Platforms     | : | Git/GitHub, Android Studio, Visual Studio Code, Figma. |
| Soft Skills           | : | Problem-solving, Team Collaboration, Time Management   |

## PROJECTS

### AI Chat Bot | TechStack: Kotlin, Gemini API, Git, Android Studio

- Developed an **AI-powered chatbot** application using **Kotlin** and **Gemini API**, designed to deliver **intelligent** and **context-aware responses**.
- Focused on **clean** and **simple UI/UX** for a **smooth user experience**, ensuring **minimal distractions** and **intuitive interaction**.
- Integrated core features like **smart prompt handling**, **real-time AI responses**, and **lightweight architecture** for **fast performance** on **Android devices**.

### Weather App | TechStack: Kotlin, OpenWeatherMap API, Firebase, Git, Android Studio

- Built a **modern weather app** using **Kotlin**, providing users with **real-time weather updates**, **forecasts**, and **location-based data**.
- Integrated the **OpenWeatherMap API** for accurate weather information including **temperature**, **humidity**, **wind speed**, and **condition icons**.
- Designed a **minimalist UI/UX** with **dynamic visuals** (e.g., icons, backgrounds) that adapt to weather conditions, ensuring a **user-friendly experience**.
- Implemented features like **search by city** and **current location detection** for tracking user engagement.

### Meme App | TechStack: Kotlin, Retrofit, Meme APIs , Git, Android Studio

- Developed a **fun and engaging meme app** using **Kotlin** and **Retrofit** for **efficient API calls**, fetching **real-time memes** from popular sources.
- Designed a **clean and responsive UI** with **smooth scrolling**, **optimized image loading**, and a **minimalist design** for a great user experience.
- Implemented features like **meme sharing**, **pull-to-refresh**, and **dynamic content loading** for enhanced **user interaction**.
- Integrated **Firebase** for **user analytics**, **crash reporting**, and potential **feature expansion** like **authentication** and **custom feeds**.

## EDUCATION

**Bachelor's, Computer Science Engineering** — *Bikaner Technical University ,Bikaner*

(Sep 2023 - Jun 2027)

**High School, Central Board of Secondary Education** — *Swami Keshwanand Convent*

## ACHIEVEMENTS

### Participant – Code-E Manipal Hackathon. | Manipal University

(Mar'25)

- Developed a project titled **"Deep Space Mining"** to analyze asteroid data and predict feasibility for mining based on image processing and chemical analysis.
- Contributed as the **Backend Developer**, using Flask, third-party API integration, and ML model deployment.
- Gained hands-on experience in cross-functional teamwork, rapid prototyping, and real-time problem-solving under time constraints.

## CERTIFICATIONS

### Android App Development with Kotlin – Beginner to Advanced. | Udemy

(Apr'25)

- 55.5 hours of hands-on training in Android app development using Kotlin.
- Covered UI/UX design, MVVM architecture, Jetpack libraries, Firebase, and REST APIs.
- Instructor: Oak Academy & Mehmet ÖNGEL.

### Illuminate Entrepreneurship Bootcamp. | E-Cell, IIT Bombay in association with Bikaner Technical University

(Dec'24)

- Completed a certified bootcamp focused on entrepreneurial thinking, innovation, and startup fundamentals.
- Organized by E-Cell, IIT Bombay.
