Kandukur, AP | +91 9392868270 | inturi.nithin2004@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Kalasalingam Academy of Research and Education Srivilliputtur, India

Sep 2022 - Aug 2026

Bachelor of Technology in Computer Science and Engineering

GPA 7.7

SKILLS

Skills: Python, C, Java, MYSQL, Excel

Libraries: Pandas, Numpy, Matplotlib, Python-Docx

Technologies: Machine Learning, Artificial Intelligence, Neural Networks, Image Processing

Data Technologies: ETL processes, Data pipelines, Data Analytics, Data Manipulation

RELEVANT PROJECTS

Performance Analysis of Data Mining Techniques for Heart Disease Prediction

Dec 2024 - Jan 2025

- Conducted performance analysis using supervised learning algorithms KNN and Logistic Regression.
- Led data preprocessing efforts to prepare datasets for analysis, focusing on important metrics.
- Evaluated model performance using different measures and identified KNN as the best algorithm for accurate heart disease prediction.

Twitter Sentiment Analysis

Aug 2024 - Dec 2024

- Created a sentiment analysis model to classify tweets as positive, negative, or neutral using NLP techniques and ML models.
- Preprocessed the dataset from Kaggle by removing stop words and symbols, and utilized WordNet for word categorization.
- Implemented a Bernoulli Naive Bayes model, achieving 70% accuracy, with performance evaluated using a confusion matrix.

Image Caption Generator

Feb 2024 - May 2024

- Designed a system to generate descriptive captions for images using CNN-based feature extraction and RNN-based decoding.
- Integrated ViT image processor for feature extraction and AutoTokenizer for token generation to streamline the input-output process.
- Outlined an encoder-decoder architecture to process images and generate accurate textual descriptions.

Smart Helmet for Worker Safety in Underground Mines

Nov 2023 - Dec 2023

- Developed an IoT-based smart helmet to enhance worker safety by monitoring underground conditions using gas, temperature, and light sensors.
- Triggered alarms for hazardous gas levels 300 ppm and temperatures 60 C while automatically activating lights in low visibility. Data was transmitted to ground personnel via Bluetooth for real-time supervision and communication.

CERTIFICATIONS

- Design and Analysis of Algorithms and Database Management Systems certifications by CodeChef Nov 2024
- Database Foundations and Oracle Cloud Infrastructure 2023 AI Certified Foundations Associate certifications by Oracle Academy Feb 2024
