PERSONAL PROFILE

Hackathon Runner-Up & MLH Hackathon Finalist, passionate about AI, Analytical thinking, Data Structures, Programming, Debugging, and Software Development. A MERN stack developer with expertise in Web Application Development, Scripting, Shell scripting, Design, and Implementation of scalable backends, APIs, authentication, and continuous improvement. Actively solving problems on LeetCode, I strive to build innovative and impactful solutions, focusing on Problem-Solving, Growth, Analysis, and Documentation.

ACHIEVEMENTS

Hackathon 1st runner up- SPARKHACK JUEE (02/2025)([Project Link](#))

- Skills:** API Integration, Software Development Life Cycle (SDLC), Backend **Infrastructure, Reliability**, Authentication, and **Performance Optimization, Innovation**

SQL Certification (09/2024)([Link](#))

- Skills:** MySQL, SQL, Testing, **Data Analysis**, and **Transactions Handling**

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript (**Functional Programming**)

Frontend Development: HTML, CSS, React.js (**UI/UX Optimization**)

Backend Development: Node.js, Express.js, API Development, JWT Authentication

Databases: MongoDB, MySQL

Software Architecture & Infrastructure: RESTful API Design, **Routing**, Scalable Backend Systems, SDLC

Tools & Technologies: Git, GitHub, Figma, **SDK Integration** (OpenAI API, Twilio)

Computer Science Concepts: Data Structures & Algorithms, Operating Systems, DBMS, COA, Computer Networks, Discrete Mathematics, **Issue Tracking & Debugging, Solutions-Oriented Development**

SOFT SKILLS

Communication skills, Creativity, Problem-solving skills, Adaptability, Team work, Leadership, Time management, Analytical thinking, Self-Motivation.

PROJECTS

ElderEase (Hackathon Project, Runner-Up) 01/2025-02/2025
AI-powered elderly care assistant ([Link](#))

What it does: AI-powered **Healthcare** assistant providing **personalized health monitoring, medication reminders, emergency alerts, and social engagement.**

Tech Stack: React, Node.js, Express, MongoDB, OpenAI API, Twilio.

Goals: Enhance elderly independence with a user-friendly interface, real-time alerts, and AI-driven insights for caregivers.

DevSync 09/2024 – 10/2024
real time code collaborator and online compiler ([Link](#))

What it does: Enables real-time, multi-user code collaboration with instant code execution, designed for remote team coding, debugging, and pair programming and continuous improvement of code.

Tech Stack: React, Node.js, Express, Socket.IO, JDoodle API.

Goals: Streamline collaborative development with a responsive UI and seamless, low-latency updates for efficient teamwork

EDUCATION

09/2022 – 06/2026 **Netaji Subhash Engineering College**
Bachelor of Technology in Computer Science and Engineering
CGPA:8.1/10(till 5th Semester)

06/2020 – 05/2022 **Holy Child Institute**
10+2, PCMC, Percentage:84%
