Academic Details

Program	B. Tech	12 th	10 th
Institution	IIIT Una	SAS (CBSE)	SAS (CBSE)
Stream	ECE	Math	int.
CGPA	7.32	86.4 %	80%
Year	2020-24	2018-19	2016-17

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:** JavaScript, Python, C++, C
- **Frameworks:** Bootstrap, React, Node.js

Core Competencies

Git & GitHub, Windows & Linux

Database Management Systems

VHDL & VLSI, cadence, Figma

Data Structure and Algorithms

System Design Foundations

Search Engine Optimization

HTML5 & CSS3

Structured Query Language (SQL),
PL SQL, Mongo DB

Personal Details

Date of Birth: 29th Dec 2000

Languages Known: English and Hindi

Address: 5/w8, Awas Vikas Colony,
Barabanki (225001)

Website: [Link](#)

Profile Summary

- Led the creation and enhancement of **Patientoo**, a dynamic patient management **web application**, integrating seamless real-time data updates and intuitive user interfaces to improve healthcare processes.
- Created an internship project website using **HTML, CSS, JS, and Bootstrap**, integrated with the WhatsApp API for online laundry booking services.
- **Built a bacterial colony counter using Digital Image Processing techniques with Python for automated colony counting in petri dish images.**
- Proficient in front-end and back-end development, with strong expertise in **MERN stack** (MongoDB, Express.js, React, Node.js).
- Skilled in **web technologies** including HTML, CSS, JavaScript, and Bootstrap, with experience in API integration.
- Demonstrated ability in problem-solving and developing innovative solutions, with a keen focus on **user-centric design** and functionality.

Academic Projects

Patientoo (Web-Development)

Live | [Github](#)

Tools: React, Express, MongoDB, Node.js

Roles: Full-Stack Developer

Developed a full-stack healthcare management application, enabling seamless doctor-patient interactions with features like appointment booking, payment integration (Razor pay), and user authentication, with secure APIs and cloud-based image storage via Cloudinary.

Bacterial Colony Counter

Tools: Python, DIP Techniques

Roles: Python Developer

Designed and implemented a Python-based tool on Google Colab to automate bacterial colony counting in petri dish images using advanced digital image processing techniques like blob detection. Leveraged libraries such as OpenCV and NumPy

Certificates:

- Certificate Of Completion of Master C++ Programming from Beginner to Advance-C++ Course
- Certificate Of Completion of Data Structures and OOP with C++: CS104, CS105 Masterclass
- Certificate Of Completion of System Design Foundations (A Step-by-Step Approach)
- Certificate of Completion of The Front-End Web Developer Bootcamp: HTML, CSS, JS & React

Professional Experience

Intern Project (Laundry buoy) (Web-Development)

(Jan-June, 2023)

Tools: HTML5, CSS, JavaScript, Bootstrap, WhatsApp API

Roles: Front-End Developer

Created a website using HTML, CSS, JS, and Bootstrap, integrated with the WhatsApp API, to facilitate online booking for laundry services. The platform enabled local city residents to conveniently schedule laundry pickups and deliveries.

Leadership Experience

President, **ASTRAL Club**

IIIT Una, 2023-24

- Led the club in organizing events, workshops, and seminars related to astronomy and space science in the college and local schools
- Coordinated with faculty and external experts to enhance learning opportunities for club members.
- Managed a team of 60 members, fostering a collaborative and engaging environment.
