SUMMARY

I am an enthusiastic and driven undergraduate student with a solid foundation in computer science and programming. Through academic projects, I have gained hands-on experience in software development and problem-solving. Eager to learn and grow, I am passionate about using technology to solve real-world problems and improve business processes. I am committed to delivering high-quality work, adapting quickly to new challenges, and collaborating effectively within a team. Ready to apply my skills and contribute to the success of a dynamic organization.

PROJECTS

Plant Disease Detection

This project was developed by using python programming language. The model detects the Plants disease using CNN and it gives the steps to prevent the disease. Also , it ensures which Fertilizer was the cure for the respective disease by generating the E-Commerce link address to order the fertilizers.

Hospital Management System

Developed a Hospital Management System aimed at enhancing operational efficiency and improving the quality of healthcare services. The system automates key processes to streamline workflows and ensure better management of hospital resources and patient data.

CERTIFICATIONS

- NPTEL Online Certification
- Oracle Certified Foundations Associate
- Python Boot Camp Certification @LetsUpgrade

HOBBIES

- Reading Books
- Athletic Activities

I confirm that the above details are true and accurate to the best of my knowledge and belief
