Objective

A motivated and focused Computer Science and Engineering student with a specialization in Artificial Intelligence and Machine Learning, currently in the final year of undergraduate study. Actively seeking an internship opportunity to leverage and further develop my technical expertise and communication skills in a challenging, innovative, and growth-driven environment.

Education

[Malla Reddy University, Hyderabad](#)

Pursuing Bachelor of Technology degree in CSE, specialized in Artificial Intelligence & Machine Learning

Duration: 2022 – 2026 CGPA: 8.38

Skills

HTML5 | CSS | JavaScript | Python | MySQL/SQL/SQLite | Node.js | React.js |
Communication | Problem-Solving | Analytical Thinking

Projects

[Object Detection using ResNet50](#)

[Aug 19 – Nov 29]

- Built an object detection system with ResNet50 using PyTorch and the COCO dataset.
- Applied feature extraction, RPNs, and bounding box regression for accuracy.
- Achieved efficient performance on real-world images with varied scales and occlusion.

[Empathy-Infused NLP Chatbot for Mental Health](#)

[Jan 09 – Apr 15]

- Built a GPT-2-based chatbot for emotional support with empathetic responses.
- Integrated Tkinter GUI for easy, confidential access to mental health support.
- Used VADER sentiment analysis and context retention for mood-aware replies.
