OBJECTIVE

Motivated Java Full Stack Developer with strong DSA skills ,python and experience in building secure applications. Passionate about solving real-world problems using Java and SQL. Completed projects on vulnerability scanning and email threat detection. Quick learner, adaptable, and a strong team player. Seeking to contribute to innovative solutions while growing technically and professionally.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Kalasalingam University, Srivilliputhur, Tamilnadu (Grade : 8.47/10)	2022 - Present
Intermediate Education (Physics, Chemistry, Maths) Narayana Junior college, Vijayawada, Andhra pradesh (Percentage: 94.3%)	2020 - 2022
Board of Secondary Education N.T.R High school Vijayawada, Andhra pradesh (Grade: 10/10)	2019 - 2020

SKILLS AND INTERESTS

Technical Skills: Java (Full Stack), DSA(Java),Python, DBMS(sql),Linux.

Areas of Interest: Building Full Stack applications using Java Technologies, Data structures and Algorithms

Soft Skills: Time management, Open to Learning, Easily adaptable for any Environment, Team Working.

Languages: Telugu, English, Hindi,Tamil (Moderate)

PROJECTS

Vulnerability Scanner

Python

- A vulnerability scanner for websites and subdomains identifies security flaws like misconfigurations, outdated software, or exploitable code. It helps secure the main site and its subdomains against potential cyberattacks.

Email Spamming

Python, HTML, Flask, JS, CSS

- Email spamming using virus tools involves sending malicious emails to spread malware or phishing links. Tools like Clam AV help detect and remove such email-borne threats.

POSITION OF RESPONSIBILITY

Web Developer | MLSC KARE Student Chapter

- Designed and maintained responsive web pages for event promotions, registrations, and member engagement.
- Collaborated with core team members to implement feature-rich interfaces using HTML, CSS, JavaScript, and Git.

Event Co-ordinator | ACM Student Chapter KARE

- Planned, organized, and executed technical and non-technical events, including coding contests, webinars, and workshops.
- Coordinated with speakers, participants, and internal teams to ensure smooth event operations
- Played a key role in scheduling, resource management, and post-event reporting.

PUBLICATIONS

- Research paper was accepted on implementing an Enhancing Phishing Email Detection with Claim AV and Virus total API Integration at the ICMLAS IEEE Conference 2025. The paper explores Email spamming using virus tools involves sending malicious emails
- I published a research paper on Sustainable Medical Practices: Transforming biomedical Waste into Reusable Resources at the INSDAM 2025.
